

# California OES Weather Threat Briefing

Saturday, June 26, 2021 9:00 AM PDT

**Day 1 (Saturday)**: Heat risk impacts will increase for much of the state today as temperatures warm well into the 90s and lower 100s for many interior locations. Locally gusty winds will also persist across many mountain and foothill locations, leading to elevated fire weather conditions once again.

#### **WEATHER KEY POINTS**

#### 06/26/21 - 07/02/21

#### Saturday-Friday

- High to very high heat risk impacts will spread over much of the state today, persisting through all of next week
  - Daytime highs of 100 to 110, and locally warmer, will be common over much of the Central Valley, with readings of 100 to 120
    across interior southern California
  - o Temperatures close to the coast will be much cooler through much of this heat event
- Locally breezy conditions can be expected again most afternoons in many foothill and mountain locations, leading to elevated fire
  weather conditions due to the hot temperatures and ongoing very dry weather
- An increase in showers and thunderstorms appears increasingly likely across the Sierra and southern California by the middle and latter portions of next wee, with isolated thunderstorms over the Sierras as early as Monday.

#### **CALIFORNIA WEATHER IMPACTS**

06/26/21 - 07/02/21
